

# MUSTANG SURVIVAL

# Rescue Stick™

Throwable Emergency Rescue Inflatable  
MRD100 (US) MRD101 (CAN)

U.S. Patent No. 7,004,807 & 7,128,629

## The most versatile water rescue flotation device.

Incredibly easy to use, the Rescue Stick™ provides rapid flotation assistance to a person at risk of drowning. Simply remove the baton shaped Rescue Stick™ from its waterproof bag and throw near the person. Once contact is made with the water it inflates in seconds to a large horseshoe shape keeping them afloat and their head above water until help arrives.

Measuring only 14" in length and weighing less than 1 lb., the Rescue Stick™ is the most versatile rescue flotation device available. Easily stowed in a boat, vehicle, backpack or by the pool — it will be accessible when and where you need it. Simple to repack and reuse - insert a new bobbin and screw in the replacement handle containing the CO<sub>2</sub> cylinder (Re-Arm Kit MA7206).

The Rescue Stick™ is an invaluable tool for emergency response and rescue professionals arriving first on scene to provide rapid flotation. During a water rescue it can be thrown to the victim to keep them afloat. Lifeguards can easily throw the Rescue Stick™ to someone in trouble in the water to keep their head above water until rescued. Recreational boaters can throw the Rescue Stick™ to a man overboard while maneuvering to get them out of the water.

- Can be thrown 100 feet or further with accuracy
- Provides 35 lb. of flotation in seconds to a person at risk
- Automatically inflates in seconds upon contact with the water
- Extremely easy to use – anyone who can throw a stick can use it
- Compact, reusable and weighs less than 1 lb.
- Store in your boat, vehicle, backpack or by the pool for quick access
- Waterproof storage bag included

## Automatically Inflates Upon Water Contact

1. Remove the Rescue Stick™ from its waterproof bag, and throw it near the victim.

2. The Rescue Stick™ automatically inflates in seconds upon water contact (it can also be manually inflated by pulling the activation cord).
